

R1 ROBOT PROJECTOR README

Projector Setup:

The R1 has been designed around the Yoton Y3 projector, as it provides a large amount of light and a high quality image. The projector includes an internal speaker which outputs a suitable volume level for a home setting. If you would like, a 3.5mm aux cable plugged into the bottom headphone jack on the projector will allow you to plug into an external speaker system to output a louder volume.

The Yoton Y3 Projector has a keystone and focus knob which must be adjusted until the screen is clearly displayed on the Face Sheet. The Projector's instruction manual will guide you on how to do this.

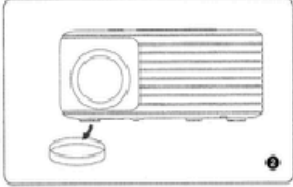

① IR
② Power Supply
③ Audio Out
④ HDMI
⑤ USB
⑥ Keystone Correction
⑦ Focus Wheel
⑧ AV

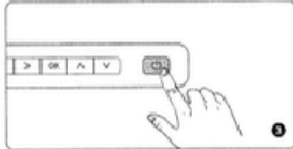

Quick Start

1 Plug the power cord into an outlet.

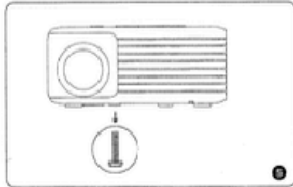

2 Take off the lens cover.

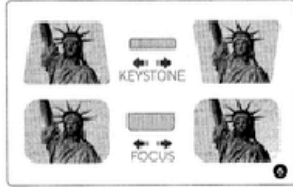

3 Press the power button to turn on the projector.

4 Press the button  or  to select the input source.

5 Adjust the screw bracket.

6 Adjust the keystone and focus wheel to get a clear image.
